

Database set-up

1. Go to MyCourses and look into the 'Datasets' folder. Download the necessary databases

(Or, if you would have other datasets, you can download them. For instance, the chinook databased is here: <https://www.sqlitetutorial.net/sqlite-sample-database/>, the Northwind database is here: <https://github.com/jpwhite3/northwind-SQLite3>)

2. Go to SQLite Studio
3. Add the database, by going to the folder where you have downloaded them on your computer (see below):

4. Connect the database (see below)
